ABSTRACT

[SUMMARY]
[OBJECT]

5

To allow large capacity and high quality software to be downloaded at low cost and high speed.

[MEANS FOR SOLVING]

In a system that allows only a user terminal 3 that has been authenticated with authentication information to watch a program broadcast from a broadcasting station 1, it broadcasts software that the user terminal 3 needs to download along with the authentication information of the user who needs to download the software. When the user terminal 3 has been authenticated, it downloads the software.
